## ABOUT

Full Stack Developer with a passion for teamwork, problem-solving, and continuous learning. I have hands-on experience leading teams in high-pressure environments and managing logistics processes using ERP systems (Axapta). This helped me develop strong organization skills, attention to detail, and the ability to deliver results, which I'm excited to bring to a team. I have worked with modern web tools and services, using AWS for Face Recognition, Render for hosting Node.js servers, and Netlify for hosting React applications.

## STACK

- **Frontend:** React.js, Redux, React Native, HTML5, CSS3, JavaScript, TypeScript
- **UI Libraries:** Material-UI (MUI), Tailwind CSS
- **Backend:** Node.js, Express.js
- **Database:** MongoDB
- **Tools:** GitHub, Postman, Webpack, Regex (Regular Expressions)
- **Deployment:** Netlify, Render, GitHub Pages
- **Cloud Services:** AWS (Face Recognition), Twilio, MongoDB Atlas

## WORK EXPERIENCE

### MeMoment:

Built a full-stack photo album platform with face recognition for personalized photo access. Guests verify identity via Twilio OTP and upload a selfie processed by AWS Face Recognition to display their photos. Developed with Node.js, Express.js, React.js, MongoDB, and tools like JWT, bcrypt.js, Joi, and Regex, ensuring secure and private functionality.

### React Application for User Access Control:

Built a user management application using React to categorize users as admins, regular users, or business users, each of them with its unique permissions. This project, designed to streamline job searches, allows business owners to create business cards and provide experience in handling user roles, permissions, and React component integration for a seamless experience.

### Interactive & Responsive Web Projects:

Interactive Web Portfolio showcasing responsive landing pages and dynamic applications. Projects emphasize clean code, logical programming, and modern development practices, featuring API integration, user management systems, task organization, and interactive tools. This portfolio reflects a strong focus on functionality, responsive design, and scalable solutions across varying levels of complexity.

## ADDITIONAL EXPERIENCE

**Logistics and ERP Specialist, PhaseOne** – Managed supply chain operations, utilized Axapta ERP for order processing and inventory management, and ensured timely delivery to clients. Developed strong organizational and problem-solving skills while maintaining high levels of accountability.

## EDUCATION

**Hacker U, Full Stack Development Course** • 2023 - 2024

- Extended Course: 535 academic hours

## MILITARY SERVICE

Served full service of almost three years as a combat soldier in the Artillery Corps in the “Namer” Battalion. during that time I was selected for the role of the commander's code assistant in the command post at a training camp for new recruits, taking on additional responsibilities as assigned by the commander.

## LANGUAGES

English .

Hebrew- native.
